

## How GDPRiS helps Schools and MATs

Almost 3,000 schools and 100 MATs currently use GDPRiS to monitor and manage their data protection compliance which is why we believe our GDPRiS platform is perfectly placed to help organise your data processing activities and ensure compliance with the UK GDPR and DPA2018.

### Joining our community of schools will give you:

- Peace of mind, with a clear pathway to compliance, along with the resources to support it
- Clarity and guidance on what the law requires of your organisation
- Unlimited advice and support via email and phone
- Practical tools and templates
- Help achieving the key requirements mandated for compliance
- The tools to drive a whole-school approach to data protection and cyber security awareness
- A simple way to embed Data protection by design and by default

### GDPRiS achieves this by providing you with:

- Quick-view compliance monitor
- More than 3,500 pre-populated data maps, RoPA (Records of Processing Activity) and supporting compliance information
- Integrated Data Protection Impact Assessment (DPIA) templates and guidance
- Fast, efficient reporting and management of Data Breaches, Cyber Incidents, SARs and FOIs
- Comprehensive auditing tools that deliver evidence-based accountability
- Extensive template procedures and policies including a Data Protection Risk Register and Privacy Policy
- Smart reporting covering all areas of data protection including an annual report to Governors
- CPD certified role-based staff training and awareness resources

## Suppliers and Records of Processing Activity (RoPA)

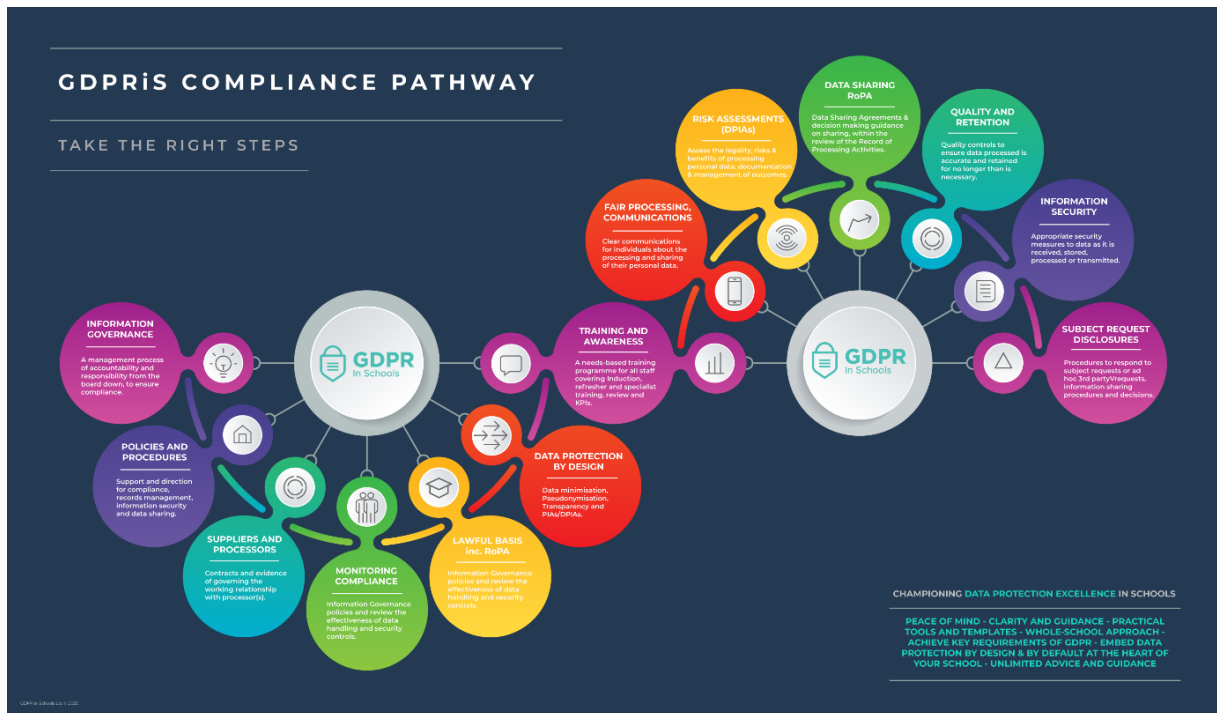

- Data mapping for more than 3,500 education software suppliers
- Supporting compliance information such as privacy policy, data sharing agreement etc
- Easy to digest RoPA cards, showing all the information you need 'at a glance'
- Editable data maps to adapt to your organisations use of that particular product
- Assign owners and users so you know exactly who is accessing and processing the data
- Run comprehensive reports on owners and users, high risk processing etc

## Integrated DPIA tool

- Carry out consistent, comprehensive DPIAs with confidence using our templates
- Objective screening questions will determine if a DPIA is required and establish its priority
- Identify data security risks and determine the likelihood of their occurrence and impact
- Quickly review and update DPIAs when changes in processing activities occur
- Collaborate and share DPIA findings with stakeholders and data processors
- Easily demonstrate measures taken for GDPR compliance, essential to help you meet Article 35 requirements
- Reduce errors and ensure completeness using a tool aligned with the GDPR and the ICO requirements

## A clear pathway to compliance

- Comprehensive bank of resources to support your compliance across 13 areas to mirror the ICO's Information Governance Controls and Resources
- Extensive template procedures and policies including a Data Protection Risk Register and Privacy Policy
- Documents written specifically for schools using education language within an appropriate context
- All documents reflect experience working with schools and MATs on their journeys to compliance
- Unlimited support and advice by phone and email

## Integrated learning area

- CPD certified role-based data protection awareness and breach awareness training
- Data Protection training for DPOs, CPOs, DP Leads
- Task-based training to help with DPIAs, SARs, Consent etc
- Comprehensive reporting on training undertaken by each staff member
